

We support the efforts of educators to assist and mainstream students with challenges.

Some modifications may need to be made to the Curricula to make sure all are included.

An example of a modification would be if a student cannot add up numbers quickly in order to balance a sample checkbook. If other students are adding 42 and 83, perhaps this student needs to add 4 and 5.

Alternatively, a student may need an easel to be lowered into order to create a painting from their wheelchair.

We are the only full nondiscriminatory Scout Program in the United States and we put our support behind educators and their desire to continue to make to their schools welcoming to all.
