Our North Star Scout Program is for Scouts aged 11-18. Activities are appropriate for that age group. North Star Scouts already know the rules of the game, so we concentrate on introducing them to new activities and instilling and appreciation for adventure in their lives. We feature camping and backpacking trips which develop true proficiency in first aid and outdoor skills in our Scouts. We also feature activities to specifically interest our Scouts over the age of 14, including programs designed to introduce them to business and community leaders. Our Scouts develop confidence and have FUN while participating in our North Star Scout Program.

Our Scouts choose, organize and lead their own meetings, programs, and activities. North Star Scouts choose their own activities such making a telescope, skateboarding, and backpacking.

Information about each aspect of our Scout Program can be found on the menu. For example, to read more about Personal Achievement, just click on the Personal Achievement link on of the menu.
